

**BE REALLY READY** 

## Stargazer Notifier

- Get Organized**     **Stay In Touch**     **Be Informed**     **Take Control**

For fast and reliable alerts and notifications, use a computer to send text messages to pre-established groups of mobile phones, with delivery confirmation. Use for your own group, school, church, business, neighborhood, and community, as well as for first responders, medical, and other official organizations.

- Quickly and easily send a short message to a pre-established group of mobile phone users
- Use for emergency alerts and disaster communications
- Use for routine notifications like school closings and changes in plans
- No high upfront cost; pay for the messages you send
- Global service that delivers messages wherever people have mobile phones
- Use reporting service to track messages (where supported by mobile carriers)
- Set up sub-accounts for easy identification of users and auditing of messages
- Set up in a few hours; no systems installation or complicated procedures
- 24/7/365 telephone and email support
